

EUCARBON®

Treatment of chronic constipation
with a natural plant laxative

Indications: constipation, especially accompanied by spasms, swelling, intense gas formation and immotile intestines; The syndrome of the irritable intestine, fissures of the anus; Preparation for X-ray and echo-graphic tests of the intestinal tract.

Counter-indications: Increased sensitivities to any of the substances; Intestinal obstruction; Intestinal atony; Acute inflammatory intestinal conditions; Kron's disease; Chronic ulcero-hemorrhagic colitis; Abdominal aches of unknown origin; Ulcers of the stomach and the duodenum; Children under 12 years of age

Pregnancy and lactation: There are no data of effects harmful to the fetus when EUCARBON is administered during the period of pregnancy. However, it is not recommended in the first three months of pregnancy. After the third month EUCARBON can be used after a careful assessment of the risk-benefit ratio. In some instances a yellow coloring of the milk has been observed. Not recommended throughout the period of lactation.

EUCARBON®

Treatment of chronic constipation
with a natural plant laxative

DOUBLE ACTION **EUCARBON®**

Fat-rich foods, slimming diets, lack of exercise and stress can all upset the balance of our digestive system.

Through its double action, based on the combination of plant and mineral substances **EUCARBON®** helps towards redressing digestive balance.

- ⑤ Medical charcoal removes toxins from the intestinal tract.
- ⑤ Plant and mineral substances have a gentle laxative effect.
- ⑤ Improves the motility of the intestines.
- ⑤ Adsorbs gases and acts as a disinfectant.

EUCARBON®

Treatment of chronic constipation
with a natural plant laxative
